

OLSEN

Olsen Model 6500 Mobile Workstation

ENHANCING YOUR PROCESS

Olsen Manufacturing is committed to forming relationships with our customers that enables them to achieve their goals. We thrive on working in a cooperative environment where our customers can leverage our years of experience to keep them competitive in today's demanding environment.

We look forward to discovering how we can become a valuable part of your team.

The rugged, reliable and efficient Olsen Model 50 Power Flare has been the industry standard for over 40 years. Implementing its conical rolling action it produces 37, 45 and 90 degree flares.

The Olsen Model 5150 Power Bender is a general utility bender with great flexibility for work in factories, maintenance repair areas, plumbing shops or field service trucks.

The Olsen Model 10 Deburring machine is designed to provide burr free tubing ready for your demanding applications.

Check out our literature for the Model 50 Power Flare and Model 5150 to identify the best fit tooling for your application
